DETAILED ACTION

1. This action is responsive to communications: Amendment, filed on 12/1/04.
2. Claims 1-44 are pending in the case. Claims 1, 9, 16, 23, 28, 30, 31, 35, 37, 38, 41, 43 and 44 are independent claims. Claim 8 has been amended. Claim 44 is newly added.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 30,37, 43,44, drawn to adjusting device-independent color space coordinates using white point and chromatic correction, classified in class 358, subclass 516.
 - II. Claims 16-22, drawn to converting color between device dependent and independent coordinates and back, classified in class 345, subclass 603.
 - III. Claims 23-27, 31-34, 38-40, drawn to adjusting phosphor values and color settings, classified in class 358, subclass 518.
 - IV. Claims 28,29,35,36,41,42, drawn to creating a display representation that matches a hard copy, classified in class 358, subclass 518.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for altering device independent color coordinates, without a method for converting between device dependent coordinates such as invention II, or a device for adjusting phosphor and color settings to improve the visual representation of colors such as in invention III or a method for manipulating color attributes to create matching real and computer generate images such as in invention IV. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, or IV, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Kelly Fitzgerald on June 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
